

## FY16-FY22 TBDRP Portfolio by Pathogen/Disease/Condition (48 Awards)

Labels on chart include percentage of total portfolio composition and number of awards (in parentheses)

**'Lyme disease and associated co-infections'** refers to studies of Lyme disease alone or with various co-infections commonly diagnosed with Lyme disease. 48% of these awards directly investigate or have implications in Post-Treatment Lyme Disease Syndrome (PTLDS), or persistent/chronic symptoms of Lyme disease.

**'Other bacterial TBDs'** currently includes Rickettsiosis and Ehrlichiosis.

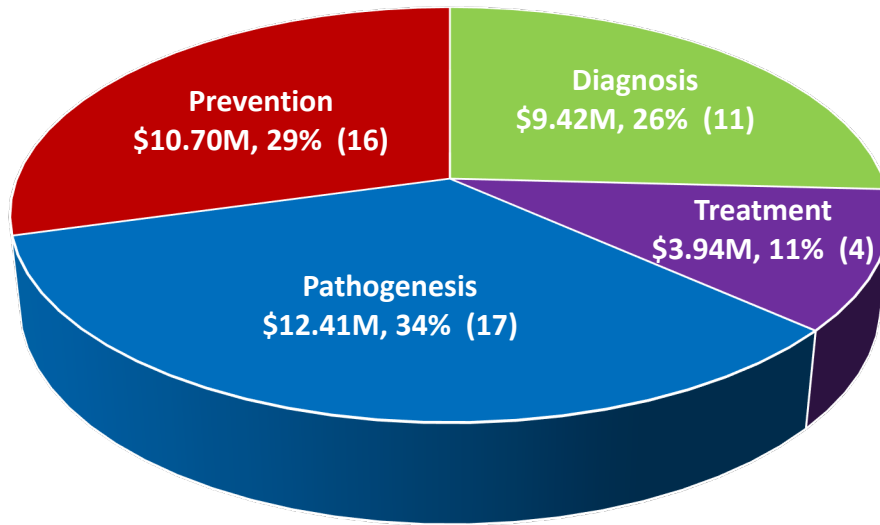

**'Viral TBDs'** currently includes Powassan, Crimean-Congo Hemorrhagic Fever, and Tick-Borne Encephalitis viruses.

**'Inclusive of all TBDs'** is indicative of studies involving approaches applicable to any/all TBDs.

**'Parasitic TBDs'** currently refers to Babesiosis.

**'Allergic conditions'** currently refers to mammalian meat allergy (Alpha-gal Syndrome).
